

Refine Status Identification

Just as science is becoming refined, in the same way, is your power of silence and your stage automatically being refined within yourself? What is the speciality of something refined? Anything that is refined may be less in quantity, but its quality is powerful. Whatever is not refined is more in quantity but it lacks quality. So here also, since you are being refined, whatever tasks you carry out in less time using less energy will be a hundred-fold and there will also be lightness. The sign of lightness is that that thing will never come down. Even against its conscious wish, it will stabilise itself up above. This is the qualification of something being refined. So, do you experience both these specialities within yourself? Because of being heavy, you have to make more effort.

When you are light, the effort is reduced. So, natural transformation takes place in this way. Constantly pay attention to both these specialities. Whilst keeping these in front of you, you can check how refined you have become. Anything refined does not wander around a great deal; it picks up speed very quickly. If something is not refined and is mixed with rubbish, it will not be able to pick up speed. It will not be able to move without any obstacles. On the one hand, you are becoming refined, and on the other hand, the fine for trivial matters, making little mistakes and for your sanskars is increasing. On the one side is this scene and on the other side, there is the scene of becoming refined: there is the force of both. If something is not refined, then consider it to be a fine.

Both scenes are visible at the same time. That is going towards the extreme and this is also visible in its extreme form. That which is incognito is becoming more visible. So the number is created according to both aspects being visible.

The rosary is not going to be threaded by your hands. You claim a number by yourself through your own activity. The time for the number being fixed is now coming close. This is why both the aspects are clearly visible, and whilst seeing both, you have to remain cheerful and a detached observer. A game which has extremes within it is liked a great deal. Only such a scene has great attraction. Even now, such a scene of a tug-of-war is being enacted. You enjoy watching it, do you not? Or, do you feel mercy? Seeing one side, you experience happiness and seeing the other side, you feel mercy for them. The play of both is taking place.

Today, Baba showed you the game to show you what is happening behind the scenes. Everything is very clearly visible from the subtle region. The higher you are, the more clearly visible everything is. Can the actors on a stage down below see anything? Being a detached observer up above, you can see everything very clearly.

Today, Baba was seeing the scenes of the games of the present time from the subtle region. Achcha.
