

## **"PORTABLE SOUND AND LIGHT SYSTEM"**

**FOR EXHIBITION / MUSEUM / VILLAGE SERVICE/ SHOW**

With the Blessing of BapDada and Co-operation of all Divine family through Good wishes...  
We have almost completed **"PORTABLE SOUND AND LIGHT SYSTEM"** for service.

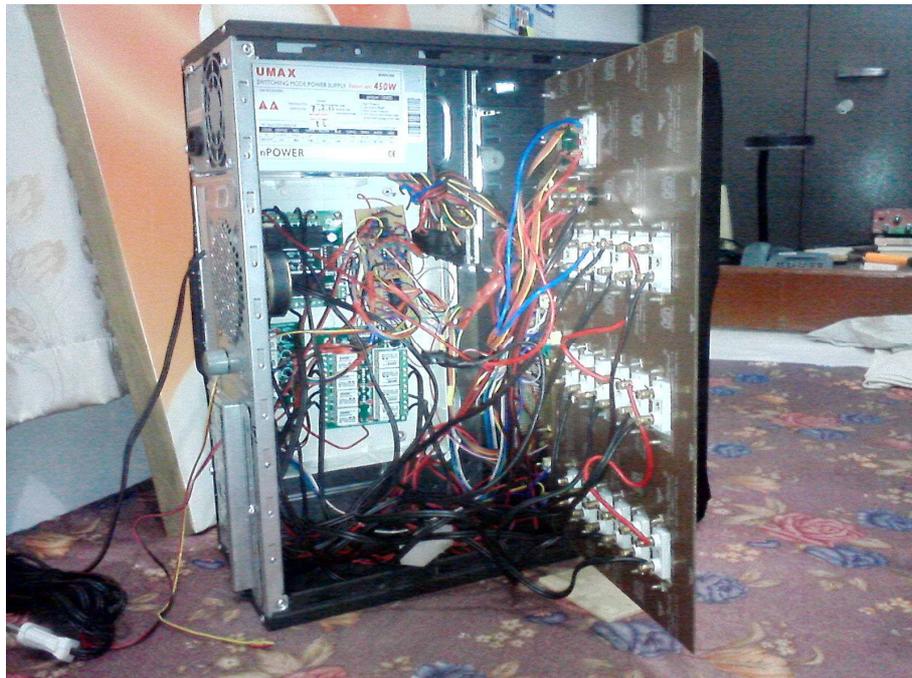

It is just **Plug and Play** Portable System for Exhibition

## Portable 18 channel Plug and Play system

**It is an 18 channel (18 Languages) Automatic Digital Electronic Sound and Light System for BK Museum is designed and developed innovated work for Service.**

**We can have maximum 18 Displays with 18 different languages for BK Exhibition or Museum or even can install in village service.**

**The innovative research work virtually started on 15<sup>th</sup> Nov. 2013 (BapDada Milan at Shantivan)**

**Within short duration (about 3 months) we succeed with the blessings of BapDada and Divine Family**

### The Sound Features of Automatic Light and Sound systems are:

- It's a Plug and Play Portable Sound and Light System
- Easy Remote control operation with Interactive manual operation
- 18 different languages (any Indian or foreign languages) can select by Remote control
- 18 channels or 18 displays with light arrangement (even flex boards) can be arranged

- There is no any fixed time duration for background commentary (1 min. to 10 hours)
- Time duration of different languages can set different timings with our convenience
- Any recorded voice can be played with Pendrive MP3 Player (build in system)
- **Even every day we can change the duration of time for each display Light and sound with different voice (18 languages)**

- **We can keep different time duration setup for VIP and Public (Simply change the sound track by Remote control)**
- **We can “Pause” Automatic Light and Sound System any time during the show time for manual interactive with visitors or public an it will continue again with “Play” button**
- **During show time if power fails and stated again with Generator, the show will continue from where it Stopped or Paused due to Power failure**
- It is not based on Computer programming and there is no programmable time setup for each channel or languages.

- It is all made by simple Electronic CMOS digital IC's and Relay with MP3 Pendrive Player.
- We can select a Sound track from Pendrive MP3 Player by Remote control and according to the track selection (any language) the Light will be ON for Displays
- We can use the same system for background music player for visitors
- **Total cost for Automatic Digital Electronic Light and Sound system is about 16,000 only !!!**
- **Displays, Photos, Lights, Speakers, Relays, Wiring and Furniture work are not included. Only the Electronic circuits and Digital Pendrive player setup may extend upto 25,000. All other arrangements are depends upon our own budget**
